Phase 1 — Account Management: Recall + Wazuh Mapping Sheet

Category: Account Management Events (27 events)

PART A — RECALL QUIZ (from memory, then verify)

Tier 1 — say the meaning AND why a SOC analyst cares

- **4728** Meaning: ***_member added to the security group_____ / SOC cares: _an attacker can add low privilege memeber in a sercurity group to bypass pivileges and do escalation ___***__
- **4720** Meaning: ***_user account created_____ / SOC cares: _it can be legit or an attacker is creating new account to create a backdoor ___***__
- **4738** Meaning: ***__user account changed____ / SOC cares: __now here an account details can be changeed by the admin acc to his current employment status or an attacker is abusing the details of trick admin __***__
- **4740** Meaning: ***_user account locked_____ / SOC cares: ___high , because it cannot be intentionally that a user is doing this its a strong indication of brute force _***__
- **4781** Meaning: ***__***Account name (SAM) changed***____ / SOC cares: ____it can be legit done by admin or changed a new user name to same like the one that admin knows to create social engineering ***__
- **4726** Meaning: ***_user account deleted _____ / SOC cares: __if done by admin is good but if in odd hours attacker can delete the account after putting his work to remove evidences __***__
- **4756** Meaning: ***_member added universal group_____ / SOC cares: ____now its also a high security group if its done by attacker then the goal is persistence or lateral movement in other cross domains ***__

All 27 events in order — one-line meaning each (memorize these)

- ■ 4720 — User account created
- ■ 4722 — User account enabled
- ■ 4723 — User attempted to change their own password
- ■ 4724 — Admin reset a user's password
- ■ 4725 — User account disabled
- ■ 4726 — User account deleted
- ■ 4727 — Security-enabled global group created
- ■ 4728 — Member added to security-enabled global group
- ■ 4729 — Member removed from security-enabled global group
- ■ 4730 — Security-enabled global group deleted
- ■ 4731 — Security-enabled local group created
- ■ 4732 — Member added to security-enabled local group
- ■ 4733 — Member removed from security-enabled local group
- ■ 4734 — Security-enabled local group deleted
- ■ 4737 — Security-enabled global group changed
- ■ 4738 — User account changed
- ■ 4740 — Account locked out
- ■ 4741 — Computer account created
- ■ 4742 — Computer account changed
- ■ 4743 — Computer account deleted
- ■ 4754 — Security-enabled universal group created
- ■ 4755 — Security-enabled universal group changed
- ■ 4756 — Member added to security-enabled universal group
- ■ 4757 — Member removed from security-enabled universal group
- ■ 4758 — Security-enabled universal group deleted
- ■ 4767 — Account unlocked
- ■ 4781 — Account name (SAM) changed

PART B — WAZUH MAPPING TABLE

Generate each event → find the alert in Threat Hunting → read the rule ID off the fired alert (data.win.system.eventID).

Event	Meaning	Wazuh rule ID	Level	Verdict
4720	User account created	60109	8	needs tuning
4722	User account enabled	60109	8	covered
4723	Password change attempted	60110	8	covered
4724	Password reset by admin	60110	8	covered
4725	User account disabled	60111	8	covered
4726	User account deleted	60111	8	covered
4727	Security-enabled global group created	60140	5	covered
4728	Member added to security-enabled globa	60141	5	covered
4729	Member removed from security-enabled g	60142	5	covered
4730	Security-enabled global group deleted	60202	5	covered
4731	Security-enabled local group created	60143	5	covered
4732	Member added to security-enabled local	60144	5	covered
4733	Member removed from security-enabled l	60145	5	covered
4734	Security-enabled local group deleted	60146	5	covered
4737	Security-enabled global group changed	60148	5	covered
4738	User account changed	60110	8	needs tuning
4740	Account locked out	60115	9	covered
4741	Computer account created	60121	5	covered
4742	Computer account changed	60121	5	covered
4743	Computer account deleted	60121	5	covered
4754	Security-enabled universal group creat	60149	5	covered
4755	Security-enabled universal group chang	60150	5	covered
4756	Member added to security-enabled unive	60151	5	covered
4757	Member removed from security-enabled u	60152	5	covered
4758	Security-enabled universal group delet	60153	5	covered
4767	Account unlocked	60133	5	covered
4781	Account name (SAM) changed	60110	8	covered

PHASE 1 DONE = all of this

- ■ Part A: all 7 Tier-1 events recalled cold, all 27 meanings memorized in order
- ■ Part B: all 27 rows filled — every event has a rule ID + level, or is marked GAP
- ■ One-line verdict per Tier-1 event: covered / needs tuning / gap
